

IN THE SPECIFICATION:

Please delete the paragraph on page 17 beginning at line 6 with the following replacement paragraph. No new matter is introduced.

A request is received from the client 114 (step 312), and forwarded to the web server ~~114~~112 (step 314). The request is intercepted by the intermediary 110 (step 316), and forwarded to the web server 112 by the intermediary 110 (step 318). The web server responds to the request by transmitting a document corresponding to the request (step 320). The intermediary 110 receives the document corresponding to the request (step 322) and provides the document to the filtering device 118 (step 324). The filtering device 118 constructs an input DOM based on the document (step 326).
